Where the city meets the woods

Hamilton County, Tennessee
Building footprints classed as intermix or interface WUI.

Carlson et al. 2022, 500 m

- 28,364 Intermix
- 42,038 Interface
- 81,338 Not WUI

Gold is intermix: wildland vegetation covers at least half the neighborhood. Ember is interface: within 2.4 km of a large wildland patch, with less vegetation mixed among the buildings.

Both WUI classes need at least 6.17 buildings per km². Footprints are current FEMA buildings. The class comes from the 2018 Microsoft footprints and 2016 land cover.

3 footprints fell outside the raster.
